

ScaleX

Multidisciplinary intensive campaigns in the TERENO-preAlpine observatory

Presented by:
Matthias Zeeman

Source: Wolf *et al.* 2017

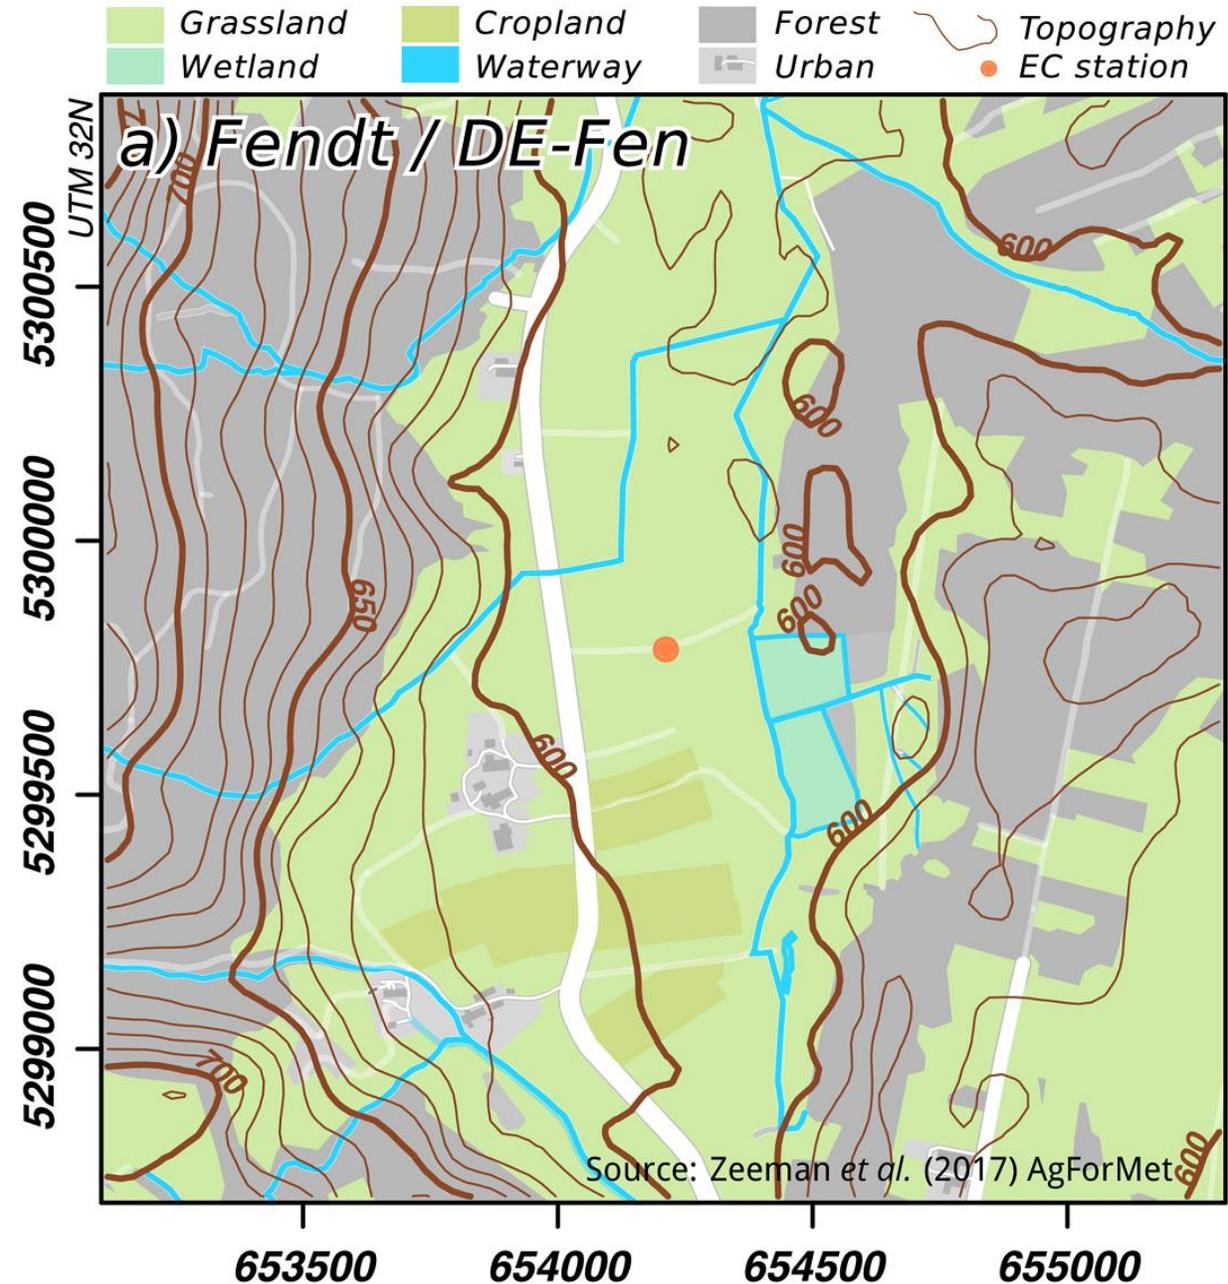

A partnership with farming community Fendt.

Permanent Infrastructure:

- ▶ Lysimeter Cluster
- ▶ Eddy Covariance (EC) & Hydrometeorology (MET)
- ▶ Soil Sensor Network, incl. Cosmic Ray probe
- ▶ Vertical profilers, incl. Ceilometer

Situated in a shallow valley, a former lake bed

Permanent Infrastructure:

- ▶ Lysimeter Cluster
- ▶ Eddy Covariance (EC) & Hydrometeorology (MET)
- ▶ Soil Sensor Network, incl. Cosmic Ray probe
- ▶ Vertical profilers, incl. Ceilometer

Situated in a shallow valley,
a former lake bed

Partnerships ScaleX 2016

- 65+ researchers
- 20+ international groups
- BSc/MSc/PhD projects

DLR	U Alberta
DWD	U Augsburg
EMPA	U Calabrien
GFZ	U Innsbruck
GWU Group	U Freiburg
KIT IMK-IFU	U Princeton
KIT IMK-TRO	U Purdue
LMU	U Wien/BOKU
METEK	Vaisala
MPI Jena	
Thuenen Institut	

Partnerships ScaleX 2016

- 65+ researchers
- 20+ international groups
- BSc/MSc/PhD projects

DLR	U Alberta
DWD	U Augsburg
EMPA	U Calabrien
GFZ	U Innsbruck
GWU Group	U Freiburg
KIT IMK-IFU	U Princeton
KIT IMK-TRO	U Purdue
LMU	U Wien/BOKU
METEK	Vaisala
MPI Jena	
Thuenen Institut	

WP1 The impact of complex terrain on biosphere–atmosphere exchange processes

WP2 The nocturnal boundary layer: vertical transport, trace gas distribution and budget

WP3 Patterns of precipitation and soil moisture from site to regional scale

WP4 Regional water and energy budgets and balances analysis by modeling and observation in the catchments of Rott and Ammer

WP5 Distributed modeling of biosphere–atmosphere GHG exchange

+ **UAV** Working group on Unmanned Aerial Vehicles

Partnerships ScaleX 2016

ScaleX Campaigns help establish a community of interest

- ▶ Community collaboration on TERENO long-term sites
- ▶ Community use of TERENO data
- ▶ Cross-discipline participation in campaigns *and* workshops

ScaleX Campaigns contribute to TERENO interests

- ▶ Extending scales; including spatial scale, resolution, variable space
- ▶ Complementary observations support cross-validation
- ▶ Supplementary observations help full-fill requirements for modeling

Agreement on use of ScaleX data:

1. “Inform those who contributed the data on your plans to use the data and any plans for publication; the data contributors should be given the opportunity to contribute substantively to publications and, as result, to be a co-author.”
2. “The term ‘ScaleX’ should be mentioned in the abstract or the keywords (if applicable) and the acknowledgement section of publications using the data, including meeting contributions. Please refer your audience to <http://scalex.imk-ifu.kit.edu> for further details about ScaleX.”
3. “Please acknowledge TERENO and its funding partners as well as the ScaleX Scientific Teams in publications using the data, including meeting contributions. The members of the Scientific Teams are listed on the ScaleX website (<http://scalex.imk-ifu.kit.edu>). Suggested phrase: ‘The TERrestrial Environmental Observatory (TERENO) pre-Alpine infrastructure is funded by the Helmholtz Association and the Federal Ministry of Education and Research. We thank the Scientific Team of ScaleX Campaign 2016 for their contribution.’”
